## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-33, drawn to task switching of a device, classified in class 719, subclass 310.
- II. Claim 34-36, drawn to identification of a device to an external system, classified in class 710, subclass 26.
- III. Claims 37-38 drawn to addition of value to a device, classified in class 705, subclass 41.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as task switching among tasks executed by a single device. See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as addition of value to a value storage device. See MPEP § 806.05(d).

separately usable. In the instant case, invention III has separate utility such as addition of value to a value storage device.. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
